

To test font-weight resolution in @font-face, the divs below have all been assigned the same font-family, but with a different weight. One invalid font-weight (Alakazam) is specified in the css and one (abracadabra) is used in a div below.

1. Droid Serif Regular
2. **Droid Serif Bold**
3. Droid Serif 400pt
4. **Droid Serif 700pt**
5. Droid Serif alakazam
6. Droid Serif abracadabra
